CURRENT COMPANY

ORBCOMM is a leading global provider of industrial Internet of Things (IoT) and Machine-to-Machine (M2M) communication solutions. The company specializes in tracking, monitoring, and controlling high-value assets across diverse sectors, including transportation, supply chain, warehousing, and heavy equipment. ORBCOMM provides critical, real-time data visibility by leveraging satellite and cellular connectivity, enabling businesses to optimize their global operations and enhance asset security.

ORBCOMM India Pvt Ltd | Technical Lead – UI
Project: THE ORBCOMM PLATFORM
Duration: March 2022 – Present
Tech Stack: ReactJS, JavaScript, Typescript, Google Maps API, Material UI, Kendo, Restful Web Services, HTML5, CSS3, Bootstrap, LESS
Role & Responsibilities:

- **Technical Leadership:** Acted as a Technical Lead, overseeing the architectural design and development of the core IoT tracking platform.
- **Real-time Asset Tracking:** Spearheaded the development of live tracking modules using **Google Maps API**, providing real-time visibility for Reefers, Cargo, Heavy Equipment, and Fleet Trucks.
- **Architecture & Modernization:** Led the strategic transition from legacy systems to modern **ReactJS** and **AngularJS** architectures to support high-scale IoT data visualization.
- **IoT Data Management:** Optimized the frontend to handle high-frequency data streams from thousands of IoT devices, ensuring seamless live updates of asset locations and statuses.
- **Component Design:** Developed advanced UI dashboards using **HighCharts**, ReactJs creating reusable component libraries that increased development efficiency across the team.
- **Responsive Excellence:** Ensured the platform's high quality and performance across all devices using **Responsive Web Design (RWD)**, **Bootstrap**, and **LESS**.
- **Client Interaction:** Collaborated extensively with stakeholders to troubleshoot complex UI issues and implement new requirements for global enterprise clients

PROJECT : **eSOLUTIONS 2**
